

# ARZOO KHARE

SENIOR PRODUCT DESIGNER

[Portfolio](#) 

I'm a Senior Product Designer, currently working for a healthcare startup - Apollo247. I've seen it grow from 30 employees to over 500 employees. I was the fourth designer to join the team & I'm very grateful to have witnessed accelerated growth as a designer. I have learned to handle projects on my own, and collaborate with project managers & developers to reach the finish line. I'm interested in interaction design and user research. Also, I'm passionate about people, culture & stories :)
